

# Unambiguous coding of the inflection of Polish nouns and its application in electronic dictionaries – format POLEX

JĘZYKOZNAWSTWO KOMPUTEROWE

## Jednoznaczne kodowanie fleksji rzeczownika polskiego i jego zastosowanie w słownikach elektronicznych – format POLEX

Zygmunt Vetulani, Bogdan Walczak,  
Tomasz Obrębski, Grażyna Vetulani

Wydawnictwo Naukowe UAM

Prof. dr **Zygmunt Vetulani**, Adam Mickiewicz University (UAM), Poznań, Poland.  
Born in 1950, Poznań. Studied mathematics (M.Sc., 1973) and romance philology (M.A., 1982) at the Adam Mickiewicz University, and foundations of mathematics at the University of Warsaw (Ph.D., 1977). Habilitation in computer linguistics at the Faculty of Neophilology of the Adam Mickiewicz University (1990). From 1987 to 1989 Research Fellowship of the Alexander von Humboldt Foundation. Main fields of interest: artificial intelligence (understanding of natural language by computer), electronic resources for language engineering (electronic dictionaries, grammars and text corpora), linguistic algorithms (parsing), formal description of languages. Publications in computer science, linguistics, mathematics and logic. Management of national and European research projects (e.g. within COPERNICUS).  
Professor at the Faculty of Mathematics and Computer Science of the Adam Mickiewicz University; head of the Department of Computer Linguistics and Artificial Intelligence (since 1993).

Prof. dr **Bogdan Walczak**, Adam Mickiewicz University (UAM)  
Born in 1942, Miłostaw. Studied Polish language at the Adam Mickiewicz University (M.A., 1965). Ph. D. in the history of Polish lexicon (UAM, 1974). Habilitation in Polish lexicography at the Faculty of Polish and Classical Philology (UAM, 1990). Lecturer of Polish language at the University of Lyon, France (1968-1971). Main research topics: history of Polish language, correctness and language performance culture in contemporary Polish, onomastics, stylistics, computer-oriented Polish morphology. Publications in linguistics.  
Professor at the Faculty of Polish and Classical Philology; dean of this faculty (since 1993).

**Tomasz Obrębski**, Technical University (Politechnika Poznańska), Poznań, Poland,  
Born in 1968, Poznań, Eng. M. Sc. in computer sciences (1994, PP). His main research domains of interest are natural language processing (parsing) and electronic resources for language engineering (dictionaries, corpora). Publications in computer science and language engineering.  
Research assistant at the Technical University, Poznań.

Dr **Grażyna Vetulani**, Adam Mickiewicz University (UAM), Poznań, Poland.  
Born in 1956, Bydgoszcz. Studied romance philology at the UAM (M.A., 1979). Ph.D. in linguistics from the Faculty of Neophilology of the Adam Mickiewicz University (1988). Main research interests and publications: comparative linguistics (Polish-French), logical and formal aspects of language (natural language quantification), computer linguistics (computer-oriented morphology of Polish). Participated in national and international research projects.  
Associate professor at the Institute of Romance Philology of the Adam Mickiewicz University.
