(Volume XXI-XXX)

- ABUL-EZ M.A., On representation of functions regular at the origin by power similar sets of polynomials, XXII, 115-124.
- ADAMCZAK MAREK, $C_a^{(\infty)}$ -almost periodic functions, XXVII, 87-98.
- AKKAR MOHAMMED (and Tajmouati Abdelaziz), Sur les diviseurs topologiques de zéro dans les algèbres localements convexes métrisables, XXV, 213-218; (and Tajmouati A., and Zinedine A.), Idéaux non removables dans la classe des algèbres bornologiques, XXIX, 7-16.
- ANIOL GRAŻYNA, On the rate of convergence of the integrated Meyer-König and Zeller operators, XXI, 41-50; On the rate of convergence of some discrete operators of two variables, XXIV, 103-112.
- ARGYROS IOANNIS K. (and Szidarovszky F.), On the convergence of nonstationary Newton methods, XXI, 7-16; Newton-like methods in generalized Banach spaces, XXII, 107-114; (and Chen Dong, and Qian Quingshan) A multipoints Jarratt-Newton type approximation algorithm for solving nonlinear operator equations in Banach spaces, XXIII, 97-108; Convergence results for the Super-Halley method using divided differences, XXIII, 109-122; On the method of tangent parabolas, XXIV, 3-17.
- ARHIPAINEN JORMA, On locally convex square algebras, XXII, 57-64.
- ARIZMENDI HUGO P. (and Palacios Lourdes F.), On Spectral Radius and Power Series in M -convex Algebras, XXVII, 23-30.
- BABAEV M-B.A. (and Ismailov V.E.), Two-sided estimates for the best approximation in domains different from the parallelepiped, XXV, 121-128.
- BAKER R.C., Small solutions of congruences, II, XXVIII, 19-34.
- BANAŚ JÓZEF (and Olszowy Leszek), Remarks on infinite systems of ordinary differential equations, XXII, 19-24.
- BARBARO CARLO (and Vinti Gianluca), On the order of modular approximation for nets of integral operators in modular Lipschitz classes, XXVI, 139-154; (and Sciamannini Sarah, and Vinti Gianluca), Convergence in BV_φ by nonlinear Mellin-type convolution operators, XXIX, 17-28.
- BARON KAROL (and Kucia Anna), On regularity of functions connected with orthogonal additivity, XXVI, 19-24.
- BARTZ K.M., On some connections between zeta-zeros and 3-free integers, XXVIII, 233-236.
- BELINSKI EDWARD (and Lifiyand Elijan), Approximation properties in L_p , $0 < p < 1$, XXII, 189-199.
- BENCHOHRA M. (and Ntouyas S.K.), Hyperbolic functional differential inclusions in Banach spaces with nonlocal conditions, XXIX, 29-40.
- BINDERMAN ZBIGNIEW, Some remarks on sequential shifts induced by right invertible operators, XXII, 71-84.
- BOBKOV VLADIMIR (and Mandrik Pavel), Adaptive algorithms for numerical solution of stiff systems, XXII, 47-56.
- BOBROWSKI DOBIESŁAW, On the approximation of positive sequence, XXV, 145-150.

- BOMBAL F. (and Villanueva I.), Multilinear operators on spaces of continuous functions, XXVI, 117-126.
- BRICCHI MICHELE, Compact embeddings between Besov spaces defined on h -sets, XXX, 7-36.
- BROWKIN JERZY, Tame Kernels of Quadratic Number Fields: Numerical Heuristics, XXVIII, 35-44.
- BRUGGEMAN R.W. (and Motohashi Y.), Fourth power moment of edekind zeta-functions of real quadratic number fields with class number one, XXIX, 41-80.
- BRÜDERN JÖRG, Some additive problems of Goldbach's type, XXVIII, 45-74; (and Perelli A.), A note on the distribution of sumsets, XXIX, 81-88.
- BU QINGYING, Ideal of infinite matrix operators on perfect sequence spaces, XXII, 181-188.
- BUTZER PAUL L. (and Lei Junjiang), Errors in truncated sampling series with measured sampled valued for not-necessarily bandlimited functions, XXVI, 25-40.
- CASTAING CHARLES (and Valadier Michel), Weak convergence using Young measures, XXVI, 7-18.
- CIESIELSKI ZBIGNIEW (and Kamont Anna), Projections onto piecewise linear functions, XXV, 129-144.
- CHALMERS BRUCE L. (and Lewicki Grzegorz), Minimal projections onto some subspace of $l_1^{(n)}$, XXVI, 85-92.
- CHAHBOUN M. (and El Kinani A.), Convexifiée d'une topologie d'algèbre $A - p$ -normée, XXIX, 89-98.
- CHEN DONG (and Argyros I.K., and Qian Quingshan) A multipoints Jarratt-Newton type approximation algorithm for solving nonlinear operator equations in Banach spaces, XXIII, 97-108.
- CICHOŃ MIECZYSLAW, On bounded weak solutions of a nonlinear differential equation in Banach spaces, XXI, 27-36.
- CONGXIN WU (and Yanzheng Duan), Musielak Orlicz spaces of functions with values in locally convex topological vector spaces, XXI, 51-56.
- COPPOLA S. (and Salerno S.), On the Distribution in the Arithmetic Progressions of Reducible Quadratic Polynomials in Short Intervals, XXVIII, 75-82.
- CORACH GUSTAVO (and Suárez Fernando D.), Rational hulls and fullness of morphism in Banach algebras, XXI, 111-124.
- CUI YUNAN (and Wang Tingfu, and Ji Donghai) Characterization of Orlicz spaces with Mazur's intersection property, XXIII, 69-76; (and Hudzik Henryk), On the uniform Opial property in some modular sequence spaces, XXVI, 93-102.
- CZOGAŁA ALFRED, Witt rings of global function fields, XXVIII, 243-253.
- DACHKOVSKI S.N., Application of the Q -method to equations related to fractals, XXX, 37-47.
- DIEROLF S. (and Schröder K.-H., and Wengenroth J.), Characters on certain function algebras, XXVI, 53-58.
- DOMAŃSKI PAWEŁ, A characterization of preduals of Fréchet injective spaces, XXI, 37-40.
- DREWNOWSKI LECH, Topological vector groups and the Nevanlinna class, XXII, 25-40; (and Wnuk Witold), Some Baire category results for measures with 'big' ranges, XXVI, 103-116; Another note on copies of l_∞ and c_0 in $ca(\Sigma, X)$, and the equality $ca(\Sigma, X) = cca(\Sigma, X)$, XXVI, 155-164.
- EDMUNDS DAVID (and Triebel Hans), Logarithmic spaces and related trace problems, XXVI, 189-204.
- ENDRES NORBERT, Algebraic conditions for completeness with respect to infima of uniformities on topological groups, XXII, 135-141.
- FIORENZA ALBERTO (and Krbeč Miroslav), A formula for the Boyd indices in Orlicz spaces, XXVI, 173-180.
- GADJEV AKIF D., On generalized potential-type integral operators, XXV, 37-44.
- GNILKA STANISŁAW, Ψ_φ spaces from another point of view, XXI, 141-148.
- GRZAŚLEWICZ RYSZARD, The isometries of $\mathcal{L}(l^p, l^r)$, XXVI, 287-292.
- GUPTA VIJAY (and Pych-Taberska Paulina), On the rate of pointwise convergence of modified Baskakov type operators, XXIV, 59-68.
- HAO CUIXIA (and Wang Tingfu), Orlicz sequence spaces that are uniformly rotund in weakly compact sets of directions, XXVI, 127-138.

- HERNÁNDEZ FRANCISCO L., Estimates of the galb of Musielak-Orlicz sequence spaces, XXVI, 59–66.
- HUDZIK HENRYK, On the distance from the subspace of order continuous elements in $L^1 + L^\infty$, XXV, 157–164; (and Cui Yunan), On the uniform Opial property in some modular sequence spaces, XXVI, 93–102.
- ISMAILOV V.E. (and Babaev M-B.A.), Two-sided estimates for the best approximation in domains different from the parallelepiped, XXV, 121–128.
- IWASZKIEWICZ-RUDOSZAŃSKA ANNA, On the distribution of prime divisors in arithmetical semi-groups, XXVII, 109–116.
- JI DONGHAI (and Cui Yun'an, and Wang Tingfu) Characterization of Orlicz spaces with Mazur's intersection property, XXIII, 69–76.
- JUTILA MATTI, On Spectral Large Sieve Inequalities, XXVIII, 7–18.
- IVIĆ ALEKSANDER, On the Integral of the Error Term in the Fourth Moment of the Riemann Zeta-Function, XXVIII, 105–116.
- KACZOROWSKI JERZY, A note on primes in reciprocal arithmetic progressions, XXV, 151–156; (and Languasco A., and Perelli A.), A note on Landau's formula, XXVIII, 173–186.
- KAMIŃSKA ANNA, Indices, convexity and concavity in Musielak-Orlicz spaces, XXVI, 67–84.
- KAMONT ANNA (and Ciesielski Zbigniew), Projections onto piecewise linear functions, XXV, 129–144.
- KANIECKI LESZEK, Some remarks on a result of A. Selberg, XXII, 171–180.
- KRAWCEWICZ W. (and Marzantowicz W.), An asymptotic estimate of the number of bifurcating solutions for the equation $-\Delta u = \mu f(u)$, XXVIII, 195–200.
- KARATSUBA A.A., The multidimensional Dirichlet divisor problem and zero free regions for the Riemann zeta function, XXVIII, 131–140.
- KĄKOL JERZY (and Perez-Garcia Cristina, and Śliwa Wiesław), Remarks on quasi-Banach spaces over valued fields, XXV, 173–180.
- EL KINANI A. (and Chahboun M.), Convexifiée d'une topologie d'algèbre $A - p$ -normée, XXIX, 89–98; (and Nejjari M.A., and Oudadess M.), Complete m -convex algebras whose positive elements are totally ordered, XXIX, 99–102; On C_p^* -seminorms for generalized involution, XXX, 49–54.
- KRBEC MIROSLAV (and Fiorenza Alberto), A formula for the Boyd indices in Orlicz spaces, XXVI, 173–180.
- KUBIAK T. (and De Prada Vicente M.A.), Lim-Inf convergence in completely L -regular spaces, XXVI, 233–238.
- KUCIA ANNA (and Baron Karol), On regularity of functions connected with orthogonal additivity, XXVI, 19–24.
- KULAS MIECZYŚLAW, On an effective order estimate of the Dirichlet L -functions in the critical strip, XXII, 41–46; Some effective estimation in the theory of the Hurwitz-zeta function, XXIII, 123–134.
- LANGUASCO A. (and Kaczorowski J., and Perelli A.), A note on Landau's formula, XXVIII, 173–186.
- LEI JUNJIANG (and Butzer Paul L.), Errors in truncated sampling series with measured sampled valued for not-necessarily bandlimited functions, XXVI, 25–40.
- LEINDLER LÁSZLÓ, On the sharpness of inequalities concerning Dirichlet series and integrals, XXV, 13–22.
- LEWICKI GRZEGORZ, On the uniqueness of minimal projections in spaces of the James type, XXV, 59–66; (and Chalmers Bruce L.), Minimal projections onto some subspace of $l_1^{(n)}$, XXVI, 85–92.
- LI MINLI (and Wang Tingfu, and Shi Zhongrui), On the U and WU points of Orlicz function spaces, XXIII, 41–58.
- LI YANHONG (and Płuciennik Ryszard, and Wang Tingfu), P -convex Orlicz-Bochner spaces equipped with the Orlicz norm, XXVI, 205–214.
- LIFLYAND ELIJAH (and Belinski Edward), Approximation properties in L_p , $0 < p < 1$, XXII, 189–199.

- LENSKI WŁODZIMIERZ (and Topolewska Maria), On the speed of strong summability of double Fourier series, XXV, 77-90; (and Topolewska Maria), On the speed of strong summability of double Fourier series by special means, XXVII, 39-50.
- MANDRIK PAVEL (and Bobkov Vladimir), Adaptive algorithms for numerical solution of stiff systems, XXII, 47-56.
- MARZANTOWICZ W. (and Krawcewicz W.), An asymptotic estimate of the number of bifurcating solutions for the equation $-\Delta u = \mu f(u)$, XXVIII, 195-200.
- MASTYŁO MIECZYSLAW, Interpolation spaces containing ℓ_1 , XXV, 189-200; Interpolation of compact operators, XXVI, 293-312.
- MICHALAK ARTUR, Essential norms of Toeplitz operators on Bergman-Hardy spaces on the unit disk, XXVIII, 211-220.
- MIKOŁAJEWSKI JAROSŁAW, Oscillation of a system of two functional differential equations, XXII, 3-12.
- MORSLI MOHAMMED, Some properties of the Stepanoff-Orlicz space, XXII, 85-94; On uniform convexity of Besicovitch-Orlicz spaces of almost periodic functions, XXII, 95-106.
- MOTOHASHI Y. (and Bruggeman R.W.), Fourth power moment of odd kind zeta-functions of real quadratic number fields with class number one, XXIX, 41-80.
- MURTY M. RAM (and Reece Marilyn), A Simple Derivation of $\zeta(1-k) = -B_k/k$, XXVIII, 141-154.
